ENVIRONMENTAL POLICY STATEMENT

The Harboro Rubber Company Ltd manufactures natural and synthetic rubber components supplied into the manufacturing and consumer markets.

The Harboro Rubber Company undertakes to achieve its economic objectives whilst having due regard for the need to protect the environment. We are therefore committed to protecting the environment from harmful effects caused by our manufacturing processes.

A culture of risk and opportunity based thinking is adopted by the management team.

Through the application of good environmental management techniques, working within the guidelines as laid out in the latest ISO14001 combined with efficient and safe operating procedures, we shall endeavour to continually reduce or eliminate any impact on the environment resulting from these processes. The company determines its environmental aspects of its activities, products and services that it can control and those that it can influence and their associated environmental impacts, considering a life cycle perspective.

- We shall maintain compliance as a minimum with all the legal requirements applicable to our industry.
- We are committed to supporting our Customers with their environmental controls through careful selection of materials and processes, and through communication of information by such means as the International Materials Data System.
- We are committed to minimizing by control the release of any pollutants that may be responsible for environmental damage to the air, water, ground, flora or fauna.
- We shall endeavour to reduce our consumption of energy and natural resources by continually improving the efficiencies in our manufacturing equipment and production processes.
- We shall reduce the amount of waste produced and ensure that any waste disposal is through safe and responsible methods, recycling packaging and waste materials wherever possible.
- We strive to develop the awareness of all personnel concerning environmental matters and the impact that they have on the environment.
- We shall communicate our policy on protecting the environment to our suppliers and encourage them to endeavour to improve their own environmental standards and awareness.
- Procedures and processes shall be implemented and maintained in accordance with the latest ISO14001 standard.
